

Website Building: Weekend Assignment

React - Match Finding

The following exercise contains the following subjects:

- JSX
- Props
- State

Instructions:

We are going to create a fun matching app.
Select any topic you want to base the app on,
For example, animals, sports, relationships, etc.

[Live Demo](#)

Display:

- Top menu, two pictures one for the positive one for the negative and next to each there is a counter.
- Display of an image and description on the center of the screen.
- Bottom menu: two buttons, one for positive and one for negative.

The flow of the app:

The app gets fake information that contains at least a picture and description.

One image is displayed at a time.

When you click on one of the icons in the bottom menu we will move to the next image, and at the same time the counter next to the corresponding icon in the top menu will go up in one.
